Art Unit: 1746

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 3-7 and 17-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over by Satoh et al. (U. S. Pat. No. 5,979,475) in view of Japan'828.

Re claims 1 and 17, for example, note for example that Satoh discloses (see figs. 20A, 20B) the first and second vertically movable manifolds, (20, 20') which move into proximity generating a meniscus with the substrate, and the plurality of fluids (70, 71, 70', 71') also having being define beyond the plane of the substrate (see figs 1A, 1B and fig. 21) that differs from the claim only in the recitation of the third conduit for removing the fluids. Japan'828 discloses the removing conduit. It therefore would have been obvious one having ordinary skill in the art to modify the device of Satoh, to include a removing conduit as taught by Japan'828, for the purpose of quickly removing the spent contaminated fluid. Re claims 3-6, 18 and 19, Satoh discloses the fluid connections as claimed. Re claims 7 and 20, note the etching and drying (col. 4, lines 19-31).

3. Applicant's arguments filed Nov. 20, 2006 have been fully considered but they are not persuasive. In regard to the remarks that Satoh fails to disclose the carrier as claimed, attention is directed to the species of fig. 21.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
